

Appln. of: STEWART et al.
Serial No.: 09/727,466
Filed: December 4, 2000

Remarks

Drawings

The reference sign for resistor "10" in Figure 1a has been changed to "36". One of the reference signs "64" has been omitted.

Specification

The application numbers have been updated. "(Sn)" has been changed to "(SH)" in accordance with the examiner's suggestion. On page 22, reference signs "64" have been changed to "70" where appropriate in accordance with corrected Figure 5. No new matter has been added.

Claim Objections

The claims 1, 6, and 7-9 have been amended in accordance with the examiner's suggestions.

Claim Rejections – 35 USC § 112

Amended claim 1 no longer recites "a high frequency booster," thus "a high frequency video color boost circuit" in claims 8 and 9 is no longer indefinite.

In claim 8 "said balanced to single-ended output circuitry" has been amended to "said balanced to single-ended converter" and as such no longer lacks antecedent basis.

Double Patenting

Applicant respectfully contests the double patenting rejection over US 6,377,629 (the '629 patent). Claim 1 requires the "single-ended video signal color output ... selected one of a plurality of monitors." Such a selection of monitors is not disclosed or suggested by the '629 patent. Applicant requests reconsideration of the double patenting rejection in light of the claims' identified difference.

Conclusion

The examiner's careful attention to this application is appreciated. The allowance of claims 1-10 but for the above-referenced rejections is acknowledged. Applicant respectfully submits that in view of the above amendments and remarks, this application is in condition for allowance, and an early action to that effect is earnestly solicited.

Should the examiner believe that a telephone call will resolve any remaining issues in this application, the Examiner is kindly requested to contact the undersigned at the number provided.
